

TIRTH SHAH

Data Analyst | Business Intelligence | Analytics Engineering

+91 8141320360 | tirths1308@gmail.com | [Portfolio](#) | [GitHub](#) | [Certificates & Docs](#)

PROFESSIONAL SUMMARY

Final-year Computer Engineering student who builds complete analytics systems — from raw data pipelines to production-facing dashboards, not just static reports. Comfortable owning the full loop: data cleaning, ETL design, database modeling, API development, and business-facing visualization. Completed Microsoft's full Power BI Data Analyst learning path (PL-300 curriculum), and applied it across three internships spanning e-commerce, healthcare, and retail analytics. Known for taking ownership beyond what's assigned — documenting scaling paths, writing API docs, and building the version that survives contact with real users, not just a demo.

TECHNICAL SKILLS

- **Programming & Analytics:** Python, SQL, Excel & Advanced Excel
- **BI & Visualization:** Power BI, DAX, Power Query, Matplotlib, Seaborn, Dashboard Development
- **Database & Backend:** PostgreSQL, Supabase, FastAPI, REST API
- **Tools & Deployment:** Git, GitHub, Vercel, Render
- **Core Competencies:** Data Cleaning & Wrangling, EDA, ETL, Data Modeling, Star Schema Design, KPI Reporting, Risk Management, Sentiment & Predictive Analytics

PROJECTS

Olist Marketplace Analytics Engineering Platform

2026

Python · FastAPI · PostgreSQL · Power BI

- Designed a full ETL pipeline (extract → stage → star schema → API) processing 9 datasets covering 99,000+ orders and 3,000+ sellers
- Built a weighted seller performance scoring model and RFM-based customer segmentation; exposed both via a FastAPI backend with 10+ documented endpoints
- Shipped an executive dashboard tracking GMV, delivery SLA, and cohort retention; documented a production scaling path (dbt, Airflow, Docker)

Algo Trade Strategy | Quant Research

2025 – 2026

Python · OHLCV Data · Risk Management · Backtesting

- Built a rule-based intraday options algorithm for NIFTY/SENSEX, using a 10:00–10:45 AM reference window to benchmark candle width and volume, then scanning live candles for signals that beat both thresholds simultaneously and trade executed at 10:46–2:55
- Backtested 290 simulated trades across 254 sessions (Aug 2025–Aug 2026): 202 target exits, 88 stop-loss exits (69.7% target-exit rate), integrated with the Groww Trade API in paper-trade mode also live trade mode

KissanMitra – AI-Based Smart Farming Solution

2025

Python · Machine Learning · Weather API · JavaScript

- Built an AI-driven agricultural platform delivering live weather forecasting and crop health monitoring for data-informed irrigation and harvest decisions (IBM SkillsBuild AI-ML Innovation Camp)

INTERNSHIPS

Data Science Intern — XYlofy

2026

- Built the Hospital Management System's core modules — patient records, appointment scheduling, and admin workflows — using a relational database with a REST-driven front end
- Trained and evaluated an ML-based Employee Attrition model on HR data to flag at-risk employees for early retention action
- Added anomaly detection on top of a time-series Sales Forecasting dashboard to catch irregular demand spikes early

Data Analytics Intern — CodeAlpha

2026

- Cleaned and standardized 650+ restaurant reviews across 20 restaurants, 8 cuisines, and 8 cities, resolving inconsistent formats and missing fields before analysis
- Built a 6-chart visualization suite for exploratory analysis, letting stakeholders drill down by cuisine, city, and restaurant
- Applied VADER sentiment analysis and benchmarked it against actual star ratings, reaching 69.1% agreement

AI Automation Intern — IBM SkillsBuild (AICTE–CSRBOX Initiative)

2026

- Designed AI agent workflows for task generation and status tracking with structured JSON-schema outputs, keeping downstream automations parseable without manual cleanup
- Connected the workflow end-to-end with n8n so task status updated automatically as spreadsheet and employee records changed

EDUCATION

Bachelor of Engineering, Computer Engineering 2023 – 2027

SVIT, Gujarat Technological University (GTU) | CGPA: 7.65/10

Higher Secondary (12th, Science), Phoenix, Vadodara — GSEB Board 2023|66.04%ile

Secondary (10th), Phoenix, Vadodara — GSEB Board 2021|80.95%ile

CERTIFICATIONS & TRAINING

- Power BI Data Analyst Learning Path, Microsoft Learn — PL-300 curriculum (data preparation, data modeling, DAX, report design, Power BI administration)
- SQL (Transact-SQL) Training, Microsoft Learn — SELECT, JOINS, filtering, sorting, aggregation, and subqueries on relational databases
